

OPEN, INNOVATING, MOVING FORWARD.

As we transition into a new normal, non-verbal communication is key.

Drytac's unique adhesive science creates print media, protective films, and bonding tapes that deliver outstanding results and solutions for social distancing guidance.

For more information on suggested products in this guide, simply click on a product and the web page will open up with technical specifications, ratings and certifications, videos and more.

City Bus Travel Guide

- Wear a face covering when on board.
- Sit in a window seat, leaving an empty row of seats in front and behind.
- Pay with contactless or purchasing your ticket in advance on our Mobile App.
- Use the correct change if you must pay by cash.
- No eating or drinking while on board.
- Leave windows open to aid ventilation.
- No longer allowing standing.

SOCIAL DISTANCING
Keep at least
2 metres (6 feet)
from each other
Thank you

DRYTAC[®]
ADHESIVE SCIENCE

As lockdown restrictions are eased, more businesses are opening to staff and the public. Window, wall and floor graphics are essential to guide people around a space in accordance with government guidelines – such as two-metre/six-foot social distancing rules and hand washing guidance – but they must be installed safely and legally.

With our adhesive science, we have developed a portfolio of social distancing solutions for a variety of surfaces. Our quality of material will provide peace of mind in these unpredictable and ever-changing times.

WE KEEP YOU SAFE.

Whatever your needs, from fire ratings to slip ratings to FDA approvals, we've got you covered. We work to certify our products to make your life easier. The last thing anyone wants right now is to create a safety risk.

PEACE OF MIND.

As we're entering uncharted territories, best practices still remain essential for businesses to ensure their legal obligations are met and people are kept safe. This guide will help you choose solutions to adhere to the new guidelines. Simply click on a product and the associated web page will open up for more details and application videos.

DRYTAC[®]
ADHESIVE SCIENCE

THE ONLY CONSTANT IS CHANGE.

The world is changing daily. Short-term graphics can help people feel at ease and communicate new social distancing practices.

SHORT-TERM GRAPHICS MUST:

1. Be Easy To Apply

- Hand application - no tools needed
- No need for a professional installer

2. Remove Cleanly

- No messy residue to spend time cleaning

SELECTING THE PROPER MATERIAL FOR THE JOB.

As public spaces reopen, it's essential to provide guidance in the form of graphics. To meet these requirements, it's important to use the right graphics media for each job and understand the location of the graphic and the surface it will be adhered to. Using a product just because it sticks to brick or glass can result in problems down the line.

Floor graphics can help guide customers around an environment and encourage social distancing practices.

Get creative with your floor graphics and make customers feel welcomed and not overwhelmed.

Our floor graphic solutions hold slip ratings and certifications. Click on each product name to be led automatically to the product web page for more information.

FLOOR GRAPHIC SOLUTIONS

ONE PART - Indoor Print Media

SpotOn Floor 200

Slip & fire rated 200 micron printable textured white PVC film with a unique dot pattern removable adhesive. Compatible with (eco) solvent, UV and latex wide-format inkjet printers.

Polar PET 170

Slip & fire rated 170 micron printable textured white PET film with a clear re-positionable adhesive. Compatible with (eco) solvent, UV and latex wide-format inkjet printers.

TWO PART - Indoor Print Media + Laminate

SpotOn SynTac Floor + Interlam EcoTex

SpotOn SynTac Floor is a 120 micron printable matte white, self-adhesive PP film with a unique dot pattern removable adhesive. Compatible with aqueous, (eco) solvent, UV and latex wide-format inkjet printers. Interlam EcoTex is a slip rated 120 micron PP pressure sensitive overlaminating film with a pebble texture finish.

FloorTac Plus + Interlam Pro Emerytex

FloorTac Plus is a 90 micron printable matte white monomeric PVC film with a removable, pressure sensitive grey acrylic adhesive. Compatible with (eco) solvent, UV and latex wide-format inkjet printers. Interlam Pro Emerytex is a slip and fire rated 100 micron monomeric PVC pressure sensitive overlaminating film with a pebble texture finish.

SpotOn White Matte + Interlam Pro Emerytex

SpotOn White Matte is a fire rated 100 micron printable matte white monomeric PVC film with a unique dot pattern removable adhesive. Compatible with (eco) solvent, UV and latex wide-format inkjet printers. Interlam Pro Emerytex is a slip and fire rated 100 micron monomeric PVC pressure sensitive overlaminating film with a pebble texture finish.

Polar Inter/Premium + Interlam Pro Emerytex

Fire rated printable monomeric and polymeric films with removable or permanent adhesives. Compatible with (eco) solvent, UV and latex wide-format inkjet printers. Interlam Pro Emerytex is a slip and fire rated 100 micron monomeric PVC pressure sensitive overlaminating film with a pebble texture finish.

Focus on the customer experience with wall graphics. Create signage and graphics that reflect your brand and personality while still encouraging social distancing.

ANTIMICROBIAL PROTECTION FILM

PROTECT YOUR SURFACES-
against mold growth and
bacteria contamination

Protac AMP Film

with additional Microban® antimicrobial protection

Protac AMP Film is a 150µ textured polyester laminating film incorporating Microban® antimicrobial protection. When microbes meet the Microban® reservoirs in the film, the cell wall of the microbes is disrupted. The result is a film surface providing constant additional protection against the spread of microbial contamination.
